Promoter Agreement Considerations

Simplified SEO

WHAT IS SEO?

Search Engine Optimization (SEO) is the practice of enhancing a website to increase its visibility in search engine results pages (SERPs).

The goal is not just to rank highly – it is to get the right content to show up in searches from your desired audience.

WHY DOES IT MATTER?

It's one of the few marketing channels in which the results compound with time.

People often don't look beyond the first page of search engine results; sometimes they don't search past the first two listings!

Organic Search accounts for 53% of all website traffic*.
